

Exterior Pristine 70

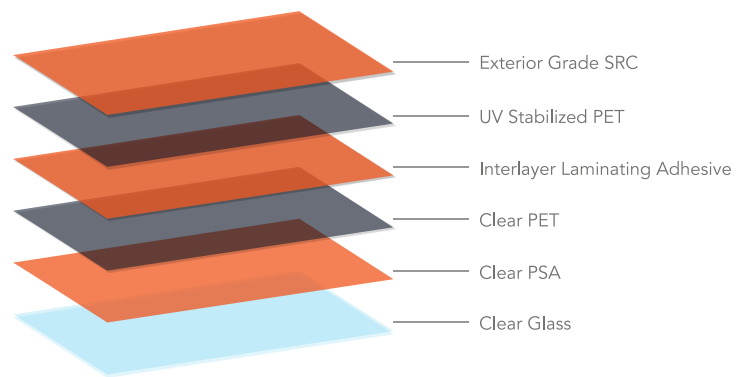

Edge X Series Window Film, the ultimate solution for enhancing privacy, reducing heat gain, and protecting your home or office from harmful UV rays. This high-performance window film is designed to provide superior energy efficiency and comfort, making it a smart investment for any property owner.

Made from durable, high-quality materials, Edge Exterior Window Film offers a long-lasting solution for your window needs. Its advanced technology allows it to block up to 99% of harmful UV rays, reducing the effects of fading and helping protect your furniture, flooring and artwork.

Edge Exterior Window Film helps to reduce the effects of the sun, making your home or office cooler and more comfortable. This means you can enjoy natural light without the worry of excessive heat and glare or high energy costs.

Product Characteristics and Construction

Visible Light Transmission	68%
Visible Light Reflectance (Ext)	9%
Visible Light Reflectance (Int)	8%
Shading Coefficient (SC)	0.61
Solar Heat Gain Coefficient (SHGC)	0.53
Solar Absorption	54%
Total Solar Energy Rejected	47%
U-Value	--
UV Rejection	>99%
Infrared Rejection	88%
Glare Reduction	25%
Adhesive Type	Pressure Sensitive (PSA)

Data was captured using the National Fenestration Rating Council's (NFRC) standard guidelines for window film solar performance measurement as measured on single pane, 1/8 inch (3mm), clear glass. Reported values are taken from representative product samples and are subject to normal manufacturing variances. Actual performance will vary based on a number of factors, including glass type and properties.
